Mac keyboard shortcuts

Historically, Macintosh computers use special symbols for certain keys, including Alt, Shift, Control, and Command keys. This guide uses these symbols as follows:

Shift . . .		Control . . .	
Alt . . .		Command . . .	
Function . . .		Mouse Click . . .	

Mac computers have a special preference for function keys in System preferences. This guide assumes your Mac is set at the default, with **Use all F1, F2, etc. keys as standard function keys** *unchecked*. In this state, you generally have to use the function key (Fn) when using function keys (F1, F2, etc.)

Disclaimer

These shortcuts were tested on Excel 2010 for Windows, and Excel 2011 for the Mac. Most shortcuts will work in earlier versions of Excel. If you have trouble with certain shortcuts, make sure that there is not a conflict with another program/application on your computer.
